SUMMARY

Fifth semester student of Data Systematization Technology at the Jaime Isaza Cadavid Polytechnic, with solid training in backend development with Java and Spring Boot. Hands-on experience in enterprise applications, MVC architectures, REST, and microservices, including Spring WebFlux-reactive approaches. Interest in clean software design, scalable architectures and good engineering practices

EXPERIENCE

Software Developer

March 2025 - Present

Atlético Nacional S.A

Itagüí, Antioquia

- Support in the area of systems support and active participation as a backend developer.
 - I led the implementation of customized software to manage the entry of administrative personnel to the stadium.
 - Application development using Spring Boot, Spring Security and Thymeleaf under MVC architecture.
 - Implementation of persistence with Hibernate/JPA and database version control using Flyway.
- Configuring CI/CD with GitHub Actions and deploying to Azure Cloud.
- Optimization and automation of access control, improving security and operational efficiency.

EDUCATION

Politecnico Jaime Isaza Cadavid

June 2023 - Present

Software Developer

Medellín, Antioquia

Best fourth and fifth semester backend project.

SKILLS

Technical Skills: • Backend Java Spring Boot Spring WebFlux Spring Security Hibernate / JPA Flyway RESTful APIs
• Databases MySQL Oracle Database R2DBC • Microservices & Architecture Microservices Architecture Spring Cloud (Eureka) API Gateway Clean / Hexagonal Architecture • DevOps & Tools Git GitHub GitHub Actions Docker Docker Compose Maven Postman • Frontend (Basic) HTML5 Bootstrap Thymeleaf

Languages: Native Spanish, B1 English

Additional Skills: Communication, Active Listening, Critical Thinking, Teamwork, Time Management, Strategic Thinking, Problem Solving, Adaptability
